QUALITY MAKES THE DIFFERENCE

OPTIONAL EMERGENCY REPAIRS

The advantages BVS has to offer:

- ✓ Reconditioned assembly within just a few days
- ✓ Top priority in the internal repairs process
- ✓ Express repair service possible for the multi-manufacturer product portfolio
- ✓ Repairs to uniform quality standards
- ✓ Delivery of assembly available via our own courier service

Optional emergency repairs

If you need to resolve a problem quickly and are reliant on a **working assembly**, we can offer you this additional **service** as part of our **product overhaul repair**.

As part of our **express repair service**, which is completed to the exact same **quality standards** as a general overhaul repair by our experienced technicians, you will receive your fully **functional** assembly back within a few days. During our **internal repair process**, your assembly will always be **prioritised**.

This **service** is available for all **manufacturer-independent products in our portfolio** for a small surcharge. This will ensure that a **possible machine breakdown** does not have a significant impact and you can restart production as soon as possible.

Do you need a functioning assembly the next day or even on the same day because your operations must not come to a standstill under any circumstances? Then we can offer you our **exchange service** whereby products can be delivered in **just a few hours** using our **express courier service**.

We are available to answer your questions around the clock.
