

Your advantages with BVS:

- ✓ Exclusive use of original components from the manufacturer or state-of-the-art components that comply with the current standards and legal guidelines for repairs
- ✓ Automated load tests with solar field simulation in the ABB-PVI test rack developed in-house
- ✓ Condition monitoring and commissioning using software developed in-house to simulate realistic application situations
- ✓ Software-based monitoring of the MPPTs
- ✓ Product overhaul repairs for current & discontinued inverters on cost estimate estimate
- ✓ 24-month warranty* on the entire repaired assembly

Fimer ABB Aurora Power-One inverters - Product Overhaul Repairs & Service

Thanks to our many years of experience in inverters in the industrial electronics sector, you can also benefit from this with **Fimer ABB Aurora Power One photovoltaic inverters**.

Due to a broad and good spare parts supply, we can offer you nationwide a **complete product overhaul repair** on quotation, an **express repair** for preferential processing, as well as **cleaning & inspection** for all types of inverters.

We offer a large selection of high-performance **ABB string** and **central inverters** from the

TRIO, PRO, PVI and **PVS** product families. For the plug-in units PVI-50.0/55.0 we also offer **product-refurbished replacement parts**.

Interesting for **operators of large solar parks** and **service companies for solar systems** - we also support you in the event of defective **central inverters**. This means that **costly repowering** can be dispensed with for the time being, while at the same time you can significantly extend the service life of your solar installations.

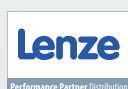

Available for you around the clock

Quality makes the difference.

ABB Inverters - Repair and service for a wide range of products

ABB (Asea Brown Boveri) Ltd. is a Swiss group of companies with extensive experience in the field of solar technology and over 140,000 employees. The high-performance Power-One inverters were integrated into the product range following the takeover of the American manufacturer by ABB and are still available to you under the new name.

The certifications of the Power One inverters remain unchanged.

Since 2020, ABB's inverter division has been owned by the Italian inverter specialist **FIMER**.

The BVS Electronics product overhaul in detail

BVS Electronics ensures a **consistent** and **high level of quality** for you. This pays off above all in the **repairs** carried out, in which **original components** authorised by the manufacturer or legislator are used.

BVS's repair service always includes a complete **product overhaul**. For example, BVS **not only replaces defective components**, but also **preventively** replaces those that will wear out in the near future based on in-depth **analyses** and **many years of experience**.

In addition to **original components**, **improved components** are also used if parts can no longer be procured due to product discontinuation.

Your advantages with BVS:

- ✓ Exclusive use of original components from the manufacturer or state-of-the-art components that comply with the current standards and legal guidelines for repairs
- ✓ Automated load tests with solar field simulation in the ABB-PVI test rack developed in-house
- ✓ Condition monitoring and commissioning using software developed in-house to simulate realistic application situations
- ✓ Software-based monitoring of the MPPTs
- ✓ Product overhaul repairs for current & discontinued inverters on cost estimate estimate
- ✓ 24-month warranty* on the entire repaired assembly
